

## Annex 1: Stakeholders contacted in preliminary fieldwork

The stakeholder affiliation and also the vertical level and category are provided in each of the case study tables. Precise names have been omitted to retain a level of anonymity. The vertical level is represented by either regional or local. The local refers to municipality and commune level while the regional refers to county or sub-national level. In the case that an affiliation is not truly local or regional (e.g. district level), the vertical level is stated as both local/regional. The categories are used as a rough indication of the horizontal breadth of the range of organizations contacted. Constraints to the number of contacts and breadth include timing, scheduling conflicts and some lack of available translation.

Affiliation	Vertical Level (category)
<b>Director Sub-region Ubaye-Blanche</b>	Regional (forestry)
<b>regional geologist, RTM</b>	Regional (forestry)
<b>local technician, RTM</b>	Local (forestry)
<b>local technician, RTM</b>	Local (forestry)
